

formas de centralizar

considerando HTML:

```
<section class="section">
  <h2>Atrações</h2>
  <div class="content">
    <div class="bloco"> </div>
    <div class="bloco"> </div>
    <div class="bloco"> </div>
  </div>
</section>
```

usando

1. display: block;

```
.section .content{
  display: block;
  text-align: center;
}
.section .content .bloco{
  display:inline-block;
  border: 2px solid rgb(110, 110, 113);
  text-align: center;
}
```

2. display: block;

```
.section .content{
  display: block;
  width: 920px;
  margin: 0 auto;
}
.section .content .bloco{
  display:inline-block;
  border: 2px solid rgb(110, 110, 113);
  text-align: center;
}
```

3. display: flex;

```
.section .content{
  display: flex;
  margin: 0 auto;
  justify-content: center;
}
```
